The Applied sciences are constantly evolving, reflect and change our society.	The Applied sciences are constantly evolving, reflect and change our society.	There is a relationship between man and science.
What is a culminating project you can do for this unit?	Create a 3-D scale model of colonial NY spending time on how elements made it a healthy or not healthy place, i.e. water system, open air spaces etc.	Have students create a electronic brochure on colonial, battlefield or herbal medicine comparing it to today's practice for the same ailment	Have groups create a broadside on one of the various health issues of the time. Ie cotton gin, dangers of the mills, expanded family, infant mortality, lewis and clark medicine	Students create a power point where they Compare the lifestyle nutrition, sleep, work hours of one group from this time period (early immigrants, those out west) to themselves today.	Create a website where students discuss battlefield medicine, medical practices of the time. You can also upload some of the colonial medicine electronic brochure and make it an ongoing medical timeline.
How will the project connect to the standard?	Cities reflect what was important and it is also important to see how people's health was valued and protected or not.	Man uses science to make medicine	the health issues of the time period reflects the current values and in this time period called for future change	How people lived reflects the values of a society	Man uses science to make medicine
